

# Opening the World of Imagination

## Who We Are

International Tales is an online mp3 source for many ancient tales and stories from diverse corners and cultures from around the globe. Presented in audio format in various languages, our company consists of passionate storytellers from different countries who love to bring to life the written word and help our children continue to develop the imagination they need to live a healthy and creative life.

Our goal is to bring back values and ethics that our fast pace society tends to ignore. Statistics show children and adults with strong imagination can not only excel in life but also help others in great ways.

Tap into the world of hidden treasures and start developing the imagination our children hold within. Let them flourish!

## What We Offer

International Tales offers adventures for the minds of all ages. We desire for every child to travel through time and learn the lessons passed on to us through fairy tales and stories. As we do not want our youth to sit idle through traffic, bored in front of the TV and passively present, we provide a diverse selection of old tales filled with wonderful wisdom and epic adventure intended to inspire and ignite the individual's internal environment. Our selection grows larger every week. New languages are added as we celebrate cultural diversity intending to place a smile on the faces of all children.

Listen and enjoy!
